# INTRODUCING THE FIRST TYPE A TO GIVE ALL OTHERS AN EDUCATION.

---

**IC BUS. THE DIFFERENCE.**

It's a bold statement, no doubt. But one we can completely back up. The all-new AE Series from IC Bus is the real deal. It's the first-ever Type A that's fully integrated, which means some very bold things for you. First, it's designed to have a longer lifecycle than similar products in the industry. Second, it's completely backed from start to finish by IC Bus and our extensive dealer network.

IC Bus stands behind this proudly atypical Type A just as we do all of our products, and supports every customer at every stage of the lifecycle. Whether you're looking for special needs transportation or a smaller bus to complement a fleet of larger ones, with the AE Series, school is now in session.

# THE AE SERIES SCHOOL BUS
